RESUME

Fullstack developer and Systems Engineering student with hands-on experience building complete web products — from database schema and API design to the final user interface. Primary stack: Next.js, TypeScript, Node.js/Express, Prisma, and PostgreSQL, with additional experience in Python. Founder of ALDACODE, a freelance web development studio delivering client projects and self-initiated products.

EXPERIENCE

Founder & Fullstack Developer — ALDACODE

Freelance · Present

- Design and development of end-to-end web applications for clients and personal projects, covering frontend, backend, and deployment.
- Built TRACKON, a logistics dashboard with a custom backend using Node/Express, JWT authentication, security middleware, and a Prisma data schema; deployed on Railway, Vercel, and Neon PostgreSQL.
- Developing Health Samay, a SaaS platform for nutritionists with a dual-repository architecture (Next.js + Node/Express/Prisma) and authentication managed via Clerk.
- Delivered client landing pages (EROS Ingeniería, SAMAY Nutrición) including scroll animations, custom smooth-scroll, SEO setup, and domain/hosting configuration.
- Migrated the ALDACODE brand site from vanilla HTML/CSS/JS to Next.js + TypeScript + Tailwind, establishing a component architecture with custom hooks and typed data files.

FEATURED PROJECTS

- TRACKON — Fullstack logistics dashboard: React, TypeScript, Node/Express, Prisma, PostgreSQL
- Health Samay — SaaS for nutritionists: Next.js, Node/Express, Prisma, Clerk (in development)
