SUMMARY

Fullstack developer with experience building complete web products: from database schema and API to interface and deployment. Specialized in React, Next.js, TypeScript, Node.js, Express, Prisma and PostgreSQL, with additional experience in React Native, Python, C# .NET and Java.

EXPERIENCE

Founder & Fullstack Developer — ALDACODE

March 2024 - Present

- Design and development of complete web applications for clients and personal projects, covering frontend, backend, databases and deployment.
- Built TRACKON, a logistics dashboard with a custom Node.js/Express backend, JWT authentication, security middleware, and a Prisma data schema; deployed on Railway, Vercel and Neon PostgreSQL.
- Developed Health Samay, a SaaS platform for nutritionists with a two-repository architecture (Next.js + Node/Express/Prisma) and authentication managed through Clerk.
- Delivered landing pages for clients (EROS Ingeniería, SAMAY Nutrición) including animations, custom scrolling, SEO, and domain and hosting configuration.
- Migrated the personal brand site (ALDACODE) from HTML/CSS/JS to Next.js + TypeScript + Tailwind, with a component architecture and custom hooks.
- Developed the PicPdf APK for Android, built with React Native + SQLite + Expo. Includes PDF history with SQLite, draggable list items, and an APK built with Expo EAS. Tested with Jest.
- Developed a voice assistant in Python that performs web searches via voice commands, using speech recognition (SpeechRecognition) and browser automation with anti-bot evasion (Selenium, undetected-chromedriver).
- Created FinanciApp and To-Do App, PWAs built with React + Tailwind and the VitePWA Plugin. FinanciApp includes a multi-page view using React Router, and To-Do App uses localStorage to maintain consistency and history of lists created on the user's device.

FEATURED PROJECTS

- TRACKON - Fullstack logistics dashboard: React, TypeScript, Node/Express, Prisma, PostgreSQL
- Health Samay - SaaS for nutritionists: Next.js, Node/Express, Prisma, Clerk (in development)
- Landing pages - samaynutricion.com and burgnribs.nelify.app: HTML/CSS/JS with responsive, results-oriented design.
- PicPdf: React Native, SQLite, Expo, Jest. Android APK.

TECHNICAL SKILLS

Frontend	Next.js, React, TypeScript, Tailwind CSS, React Native
Backend	Node.js, Express, Prisma ORM, PostgreSQL, REST APIs, JWT
Other languages	Python (PCEP certification), FastAPI, Java, C#/.NET
Tools	Git/GitHub, Vercel, Railway, Neon, Clerk, Figma

EDUCATION

Computer Systems Engineering

Universidad UCAD
